

Main Auditorium

7TH OCTOBER 2022

**SESSION 01 —
PVC RESEARCH GOT
TALENT PRIZE SESSION**
09h00

**SESSION 02 —
FEBVS@PVC
PRIZE SESSION**
10h00

11h00
Coffee Break

11h30
Medtronic Symposium
Endoanchor, the game
changer to the proximal
sealing zone challenge

**SESSION 03 —
EVST PRIZE SESSION**
12h00

13h00
Lunch

SESSION 04
14h00
Artificial intelligence
to predict SFA plaque
histology

14h10
Challenging the status
quo of superficial
peripheral arterial
diverse priority

14h20
Paclitaxel eluting
devices. Where are we?

14h30
GLASS validation: useful
clinical tool or
unpractical research
vehicle?

14h40
Atherectomy devices in
superficial and popliteal
arteries. When and how?

14h50
Discussion

SESSION 05
15h00
Aortobifemoral bypass is
dead! It's a matter of what
stent to use for the aorta

15h10
What's new regarding
vascular mimetic
implants?

15h20
New balloon expandable
covered stent: overcoming
previous limitations

15h30
Overcoming the challenge
of treating the aortoiliac
bifurcation

15h40
Risk of major amputation in
patients with intermittent
claudication undergoing
early revascularization

15h50
Discussion

16h00
Coffee Break

16h30
Boston Scientific
Symposium
The importance of a good
vessel preparation with
rotational atherectomy
in highly calcified
femoropopliteal lesions

SESSION 06
17h00
Near occlusion: when to
and when not to intervene

17h10
Local anaesthesia is safer
than general anaesthesia
for CEA – increasing
evidence from RCT's
and registries

17h20
Transcarotid CAS with
flow reversal is a promising
technology and safer than
transfemoral CAS

17h30
Mini-skin incision for
CEA should be the
"gold standard"

17h40
Outcomes for carotid
artery revascularization
perioperative assessment:
are 30-day stroke, death
and MI outdated?

17h50
Discussion

18h00
End of Sessions

8TH OCTOBER 2022

SESSION 07
09h00
Surgical techniques for
open thoraco-abdominal
aortic repair in connective
tissue disorders patients

09h10
What is the current role of
the STABILISE technique in
the management of type B
aortic dissection?

09h20
Open repair of post type
B dissection thoraco-
abdominal aneurysm
is still a valuable choice

09h30
Prevention of cerebral
microemboli and silent
infarctions after TEVAR

09h40
Relevance of shaggy aorta
in open TAAA surgery

09h50
Discussion

SESSION 08
10h00
Pre-operative screening
and risk management
of AAA patients: new
strategies to minimize
radiation during aortic
procedures

10h10
Three-dimensional
ultrasound in AAA
surveillance – status
and perspectives

10h20
Long-term results of EVAR
outside device IFUs is not so
bad: when is it acceptable to
use EVAR devices outside
their IFUs?

10h30
Association of Hospital
Volume with Perioperative
Mortality of Endovascular
Repair of Complex Aortic
Aneurysms

10h40
Are we over treating AAA?

10h50
Discussion

11h00
Coffee Break

11h30
Abbott Symposium
BTK and Diabetic Foot
Revascularization.
When and Why

SESSION 09
12h00
Vascular evidence can be
generated from RCTs and
registries or routine data –
the example of aortic
aneurysms and carotid
stenoses

12h10
Contemporary methods
for simulation-based
education in AAA repair –
open and endo

12h20
The importance of
simulators to assess the
surgical training and skills

12h30
Volume-outcome in aortic
surgery and failure to rescue

12h40
The value of training
programs to reduce the
radiation dose exposure

12h50
Discussion

13h00
Lunch

SESSION 10
14h00
Sac shrinkage as a
surrogate for long term
success after EVAR

14h10
Value of conformable
devices for angulated
necks

14h20
How sac regression at
1 year affects all-cause
mortality at extended
timepoints: key insights
from the ENGAGE registry

14h30
Sac dynamics after
fenestrated and branched
EVAR: what to know

14h40
Sac shrinkage following
EVAR: data from the
GREAT registry

14h50
Discussion

SESSION 11
15h00
Evaluation of patients
with CVI must not always
include pelvic venous
imaging in addition to
lower extremity imaging

15h10
Varicose veins,
interventional treatments
and cost effectiveness

15h20
Foam sclerotherapy:
indications and limitations

15h30
Simultaneous or staged
varicose vein treatment
after saphenous ablation

15h40
Integrated anatomic
and hemodynamic
classification for primary
superficial venous disease

15h50
Discussion

16h00
Coffee Break

SESSION 12
16h30
How to measure
PTS disease and
outcomes after
operative treatments

16h40
Deciding when inflow
is inadequate for
venous stenting

16h50
Which pharmacological
therapy after stenting

17h00
Which compression
in acute DVT and
how to apply

17h10
Acute DVT and early
thrombus removal:
who, when and how

17h20
Discussion

17h30
End of Sessions

PORTO VASCULAR CONFERENCE 2022

10 YEARS

Medium Auditorium

**SESSION 13 E 14 —
GP SESSION
OS CUIDADOS PRIMÁRIOS
E A CIRURGIA VASCULAR -
DESAFIOS E PROBLEMAS**
14h30
**O tempo passa, os
artigos científicos ficam**

14h45
**Dificuldades vasculares
na gestão do doente em
cuidados paliativos
domiciliários**

15h00
**Partilha e discussão
de questões sobre
o Tratamento.
Cuidados de Penso
da úlcera nos CSP e
interligação com os CSS**

15h15
**Abordagem da
trombose venosa
profunda e trombose
venosa superficial
Reconhecer e orientar
atempadamente nos
Cuidados de Saúde
Primários**

15h30
**Doença Arterial
Periférica**

15h45
**A reabilitação do utente
com patologia vascular
em cuidados continuados**

16h00
Encerramento

7TH OCTOBER 2022

**SESSION 15 —
TECHNICIANS SESSION**
16h30
TIPIC syndrome

16h40
**Neuro-POCUS: Transorbital
Ultrasound Assessment**

16h50
**Contrast ultrasound
(CEUS)**

17h00
**Plantar Acceleration
Time - a new tool in the
complementary diagnosis
of the degree of PAD -
original study**

17h10
Diabetic foot

17h20
**Pitfalls and challenges
in peripheral vascular
ultrasound**

17h30
**Ultrasound study in
acute lower limb pain:
Differential diagnosis
of DVT**

17h40
**Arteriovenous Fistula -
Multidisciplinary in pre and
postoperative assessment**

17h50
**Importance of ultrasound
in the Cardiothoracic
Surgery Operating Room**

8TH OCTOBER 2022

**SESSION 16 —
NURSES SESSIONS**
09h10
**Endarterectomia
Carotídea: Instrumento
de Avaliação**

09h21
**Os cuidados de
enfermagem à pessoa
submetida a fibrinólise**

09h32
**Hospitalização Domiciliária:
uma alternativa ao interna-
mento convencional**

09h43
Discussão

**SESSION 17 —
NURSES SESSIONS**
09h55
**Selagem de feridas difíceis
com terapia de pressão
negativa - desafios**

10h06
**Tabela TIME uma melhoria
na abordagem à ferida**

10h17
Biofilme

10h28
**Simplificar a Terapia
Compressiva**

10h58
Discussão

**SESSION 18 —
NURSES SESSIONS**
11h35
**Covid e o impacto na saúde
mental do utente com
patologia vascular:
perspetiva de enfermagem**

11h46
**Avaliação psicológica da
pessoa com doença arterial
periférica submetida a
amputação major**

11h57
**Promover Saúde Mental
nos profissionais de Saúde**

12h30
Discussão

**SESSION 19 —
RAPID PACE 1**
14h00

**SESSION 20 —
RAPID PACE 2**
15h00

SPONSORS

PLATINUM

GOLD
